**Questions 16 to 18**

Read the speech below and answer the questions that follow.

A very good morning to the headmaster, teachers and fellow friends. Today, in conjunction with the Environment Day celebration, I am going to give a speech entitled ‘Pollution of the World’s Oceans’.

Firstly, a lot of solid waste has been disposed of into the oceans by irresponsible ships and factory owners. This reckless action makes our seas polluted.

Secondly, our lakes and rivers are polluted with fertilisers and pesticides from farming activities. Another source of pollution is industrial waste such as steel and iron. All of these wastes will eventually flow into the ocean and will lead to pollution.

Polluted sea water has many harmful effects on the environment. Apart from killing sea creatures, people who eat them may have health problems later. It also kills tiny sea creatures that are a source of food for larger fish. This is the most important reason why we should not pollute the world’s oceans. It can only bring harm to us.

The crow was very proud. She thought she was the most beautiful bird in the forest. She liked to spend her day looking at her reflection in the water. Her glossy black feathers shone under the sun as she flew about in the forest.

One day, the crow went to see an old owl. She wanted the owl to tell everybody that she was the most beautiful bird in the forest. The wise owl agreed to do so only if there was no other bird more beautiful than the crow.

A contest was held to find the most beautiful bird. None of the other birds joined the contest except for a long-tailed, dull looking bird. All the other birds knew that they did not stand a chance of winning against the beautiful and proud crow.

The owl looked at the long-tailed bird in surprise. He thought the bird looked dull and ugly. Just then the bird bowed and spread out its tail which opened into a colourful fan.
